CFR Extractor Earns Gold Seal of Approval Rating

West Chicago, IL – CFR, manufacturer of continuous flow recycling carpet extractors, announces that its new ECO-500 AW mid-sized carpet extractor has earned the Carpet and Rug Institute's Gold Seal of Approval.

The Gold rating, one of the highest ratings possible, is awarded to carpet extractors that excel at soil and water removal, while also protecting carpet pile.

The ECO-500 AW first made its debut at the recent ISSA/INTERCLEAN® North America tradeshow in Las Vegas.

“Of course we were very excited to receive this news especially since the machine is so new,” says Doug Berjer, Product Manager for CFR. “This is a compliment to our engineering department.”

Like other CFR extractors, the machine recycles water/cleaning solution so that it can be reused up to seven times before emptying. This is designed to help conserve water, chemical, and helps speed carpet cleaning.

Berjer adds that he has just begun demonstrating the machine to CFR reps and distributors, “and this Gold rating will certainly generate [a lot] more interest in the machine.”

About CFR, a Tacony Company

CFR designs and manufactures a complete range of eco-friendly carpet cleaning systems and high performance specialty tools with an innovative, patented technology that is radically different from other carpet cleaning systems. Continuous Flow Recycling (CFR) technology provides superior

moisture-controlled cleaning, faster drying times, and increased cleaning productivity that is unmatched compared to standard carpet extractors on the market today. Through a state-of-the-art recycling filtration system, coupled with moisture-controlled atomization wand technology to minimize carpet moisture, CFR is the Greenest carpet cleaning system available.
